Screen message readers.**

Figure 75: Displaying the Command Action List—Using the Detailed or Summary Full Screen Message Reader

In the previous figure (Figure 75), we chose the Detailed Full Screen message reader to manage messages in our "Transportation News" mail basket.

We first selected messages using the message selection functionality, so we could subsequently perform group actions on the selected messages. For this example, we chose to select all four messages by entering ".1-4" at the "Enter message number or command:" prompt.

After selecting the messages, we entered a single question mark ("?",) at the "Enter message number or command:" prompt. MailMan displayed the list of available action codes.

*For more information on selecting messages for subsequent group action, please refer to the action codes described in the "Message Selection Actions" topic in Chapter 2 in the "MailMan V. 7.1. & Patch XM*7.1*50 User Manual."*

The list of action codes available with the new Detailed or Summary Full Screen message readers will differ from those action codes available with MailMan's Classic message reader. Also, some action codes are only available when certain conditions exist (e.g., messages selected for subsequent group action).

For a complete list of action commands available with basket message lists, please refer to Table 3 that follows in this chapter.

MailMan's Classic Message Reader Command Actions

The following example (Figure 76) illustrates how you would display the available actions for a particular mail basket when using MailMan's Classic message reader:

```
Select MailMan Menu Option: rml <RET> Read/Manage Messages
Select message reader: Detailed Full Screen// cla <RET> Classic
Read mail in MAIL BASKET: IN// TEST II (4 messages, 1 new)
Last message number: 4 Messages in basket: 4 (1 new)
Enter ??? for help.

Subj: TEST BROADCAST From: POSTMASTER
TEST II Basket Message: 4// ???

Press ENTER to read message 4. Enter a message number (1-4) to read
a message in this basket. Enter an internal message number to read any
message still on the system, which you ever sent or received. Enter:
? or ?? Display a summary or detailed list of messages in this basket
???? or ?HELP Display detailed help
?string Search for messages in this basket whose subject
contains the specified string
??string Search for messages you once sent or received
whose subject begins with the specified string

```

Enter three question marks here to display the list of action commands available with the Classic message reader.

Figure 76: Displaying the Command Action List—Using the Classic Message Reader

In this figure (Figure 76), we chose the MailMan's **Classic** message reader to manage messages in our "TEST II" mail basket. Upon entering three question marks ("???") at the "TEST II Basket Message: 4//" prompt, MailMan displayed the list of available action codes.

The list of action codes available with MailMan's Classic message reader will differ from those action codes available with the new Detailed or Summary Full Screen message readers.

For a complete list of action commands available with basket message lists, please refer to Table 3 that follows in this chapter.
